CAREER OBJECTIVE

Motivated Computer Science student with skills in Python, SQL, Flask, MySQL, and Web Development. Seeking a Software Engineering / AI & Data Engineering Internship to apply my backend development and API integration skills. Passionate about building real-world applications and learning new technologies.

EDUCATION QUALIFICATION

Guru Nanak Institution of Technology , Bachelors of Computer Science	NOV 2022 - MAY 2026
• GPA : 8.2/10.0	
Sri Gayatri Junior College , Intermediate (MPC)	JUN 2020 - JULY 2022
• Grade (Percentage): 89.9	
Santhi Nikethan High School , State Board High School	APR 2020
• GPA : 10.0/10.0	

TECHNICAL SKILLS

Programming languages : Python and SQL

Web technologies : HTML, CSS and JavaScript, Flask, APIs, API Integration

Databases : MySQL

Libraries & Tools: Chart.js, Flask-Login, Flask-Bcrypt, NumPy, Matplotlib

PROJECTS

Interview Tracker	🐙 GitHub
• Developed a full-stack web application using Python, Flask, MySQL, HTML, CSS, and JavaScript. • Implemented secure user authentication using Flask-Login and Bcrypt for login, signup, and session management. • Created an analytics dashboard using Pie Charts and Bar Graphs for interview performance tracking. • Built CRUD operations for managing interview records and storing data efficiently in MySQL. • Integrated AI-powered chatbot support to improve user guidance and interview preparation. • Tools Used: Python, Flask, MySQL, HTML, CSS, JavaScript, Chart.js	
AI Image Generation Web Application	🐙 GitHub
• Developed a full-stack AI-enabled web application using Flask and ClipDrop API for image generation. • Designed and implemented API integration to interact with AI services. • Built backend logic for handling user requests, prompt processing, and image generation workflows. • Implemented authentication, session management, and database storage using MySQL. • Tools Used: Python, Flask, MySQL, HTML, CSS, ClipDrop API	
Facial Age Estimation Using Deep Learning and Image Processing	🐙 GitHub
• Developed a deep learning model using Convolutional Neural Networks (CNN) to classify facial images into age groups (Young, Middle, Old). • Implemented image preprocessing techniques such as resizing, normalization, and array conversion to improve model input consistency and prediction accuracy. • Achieved 98% accuracy with performance metrics including Precision, Recall, and F1-score. • Implemented image preprocessing pipelines, including face detection and feature extraction. • Tools Used: HTML, CSS, NumPy, Matplotlib, Flask and Python
